

## ABSTRACT OF THE DISCLOSURE

This invention describes a System and method for transferring multiple files between a Web Server and a Web Enabled Device, utilizing a drag and drop user interface. To transfer the files from a Web Enabled Device to a Web Server, the user first selects all the files on the Web Enabled Device that need to be transferred. The user then drags the files from the Web Enabled Device on to a specified location of a Website hosted by the above mentioned Web Server. To transfer the files from a Web Server to a Web Enabled Device, the user first selects all the files on the Website that is hosted by the Web Server. The user then drags the files from the Website on to the desired location in the Web Enabled Device.
